STARTING AT \$45/LINE FOR 4 LINES

## MAKING THE SWITCH FROM 3G TO 4G NETWORK

To get a better understanding of this transition we want to first explain the difference between 3G and 4G. The “G” stands for “generation,” meaning 4G is the most current generation of cell phone network coverage and speeds. 3G technology created the first networks fast enough to make smartphones practical. Before that, they were too slow to allow you to do all the things that make smartphones great, like streaming videos, surfing the web and downloading music.

But, 4G has really allowed smartphone technology to spread its wings because it's much, much faster than 3G. When you want to download a new game or stream a TV show in HD, you can do it without buffering and lags that make the experience not worth the wait.

As the demand for 4G devices has increased, the need for the 3G network has become more obsolete. This is why we are making the transition to the 4G Network. Starting in 2018, we will no longer be able to activate 3G devices. By the year 2020, all 3G devices will fail to work.

### WHAT DOES THIS MEAN FOR ME?

In order to make this transition smooth we are going to give you a \$100 credit on your bill if you switch from 3G to 4G\*. Plus, get the 300 Talk and Text plan for \$25/month.

### NEW DEVICES

We now have the 4G flip phone—the LG Exalt. This phone is very sleek. Its

compact body sports a 3.0-inch screen with big, tactile buttons, making it easy to see and easy to use. **STOP BY OUR OFFICE TODAY TO SEE THE LATEST AND GREATEST DEVICES.**

**LG Exalt**

\*Restrictions may apply. Cannot be combined with any other promotion. Offer expires 12.31.17.

# WHICH INTERNET SPEED IS RIGHT FOR YOU?

The average US household has around 8 internet-connected devices. This includes computers, laptops, tablets, smartphones, gaming systems, and video streaming boxes like Roku and Apple. Each uses a portion of the available internet capacity in your home.

## DOWNLOAD SPEED

How many activities do you and your household typically access each day? If most of the internet activity involves watching video, checking email, and collecting data and information from the web to your computer/device, you should be aware of your download requirements.

## UPLOAD SPEED

If you have gamers or avid video streamers who frequently upload home movies to a YouTube® channel, or who spend a great deal of time using video chat, you are pushing content from your computer to

the internet and should be concerned with your internet upload speed.

INTERNET ACTIVITY	DOWNLOAD SPEED						
	1.5	3.0	6.0	15	25	50	100
Emailing	X	X	X	X	X	X	X
Online Shopping/Browsing	X	X	X	X	X	X	X
Downloading Music	X	X	X	X	X	X	X
Social Networking (FB, Pinterest)	X	X	X	X	X	X	X
Sharing Photos (small)			X	X	X	X	X
Internet Gaming			X	X	X	X	X
Video Conferencing			X	X	X	X	X
Watching TV/Video Clips			X	X	X	X	X
Emailing/Uploading Lrg Files				X	X	X	X
Downloading Movies				X	X	X	X
Streaming SD Video				X	X	X	X
Streaming HD Video				X	X	X	X
RPG & MMO Gaming					X	X	X

## CHANGES TO YOUR TV SERVICE COMING SOON

WE ARE UPGRADING OUR TV SERVICE & BRINGING YOU MORE FEATURES:

What's Hot App

Weather App

Cloud DVR\*

Manage MyTV App

DVR Trick Play

Easy Guide Search

Binge Mode Playback

System Messaging

Voice Services on TV

Games

To prepare for the updates, we will need to reformat your DVR. This means that

**ALL RECORDINGS YOU HAVE ON YOUR DVR WILL BE DELETED.**

Unfortunately there is no way to transfer them over to the new platform.

We advise you to watch any unviewed recordings prior to the update to ease the transition.

\*Not all customers will be able to get this feature in the beginning.

DOES YOUR **COMPUTER**  
HAVE YOU TIED UP?  
WE CAN FIX IT.
